VERGÉS

ES

Nuestro compromiso desde Vergés es fabricar muebles duraderos, confortables e inclusivos, que envejezcan con dignidad y belleza.

Desde 1970, trabajamos en un entorno natural y privilegiado de La Garrotxa (España), alejados del bullicio de la ciudad y a medio camino entre el mar Mediterráneo y los Pirineos. Conscientes de que nuestro legado también está en la transmisión de conocimiento entre generaciones, continuamos fabricando con técnicas artesanales. Con la inquietud de mejorar cada día incorporamos nuevas tecnologías que optimizan la fabricación y nos permiten explorar diversos lenguajes contemporáneos.

En esta edición, presentamos nuevas colecciones de reconocidos diseñadores que se han sumado a nuestra manera de entender el confort y el bienestar. Todas ellas mostradas en la Casa Taller, un espacio único que transmite luz, serenidad y respeto por los materiales.

At Vergés, we are committed to crafting durable, comfortable and inclusive furniture that ages gracefully.

Since 1970, we have been working in the beautiful natural surroundings of La Garrotxa (Spain), far from the hustle and bustle of the city and halfway between the Mediterranean Sea and the Pyrenees. Aware that our legacy also lies in passing on knowledge from one generation to the next, we continue to manufacture using traditional craftsmanship. Driven by a desire to improve every day, we incorporate new technologies that optimise production and allow us to explore diverse contemporary design languages.

In this edition, we introduce new collections by renowned designers who share our approach to comfort and well-being. All of them are on display at Casa Taller, a unique space that radiates light, serenity and respect for materials.

ENG

ENSEMBLE BENCH SYSTEM ● Design: Mentsen
The bench features a simple, unpretentious design, where its ingenious and carefully crafted joints emphasize the elegance of the connections between the legs, the seat, and the central beam. It works in various lengths, linear and angled configurations and with or without backrest.

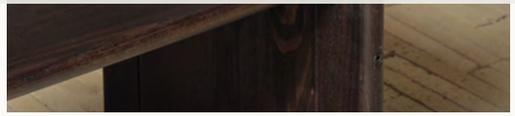
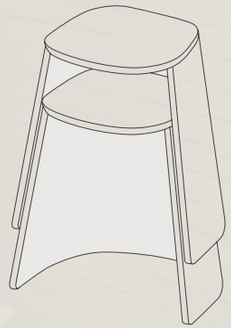
ENSEMBLE CONFIGURATIONS





SOCA BENCH & STOOLS ● Design: Emiliana Design Studio
Soca is a collection of stools and benches, distinguished by its simple and organic design. The base is crafted from a single sheet of gracefully curved wood, while the seat can be upholstered to introduce texture and color.

TREK ARMCHAIR ● Design: Anderssen & Voll
The Trek armchair combines leather and wood, giving it a simple, natural and durable look. The leather stretched over the wooden frame defines its silhouette, shaping the seat and backrest.

RENTO SOFA SYSTEM ● Design: Studio Tolvanen
The Rento collection introduces a new modular system, offering endless configurations that combine curved wooden frames with soft cushions that gently cradle you as you sit.

RENTO SOFA SYSTEM ● Design: Studio Tolvanen

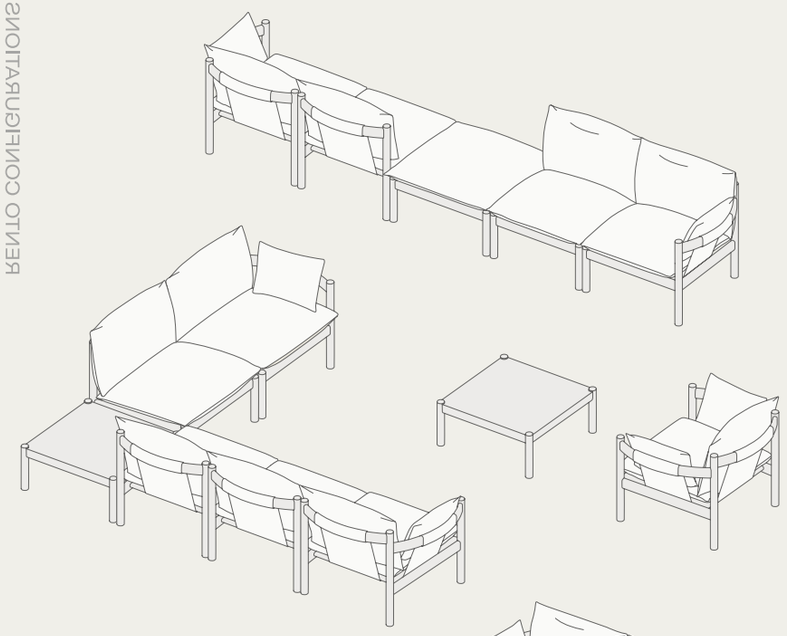
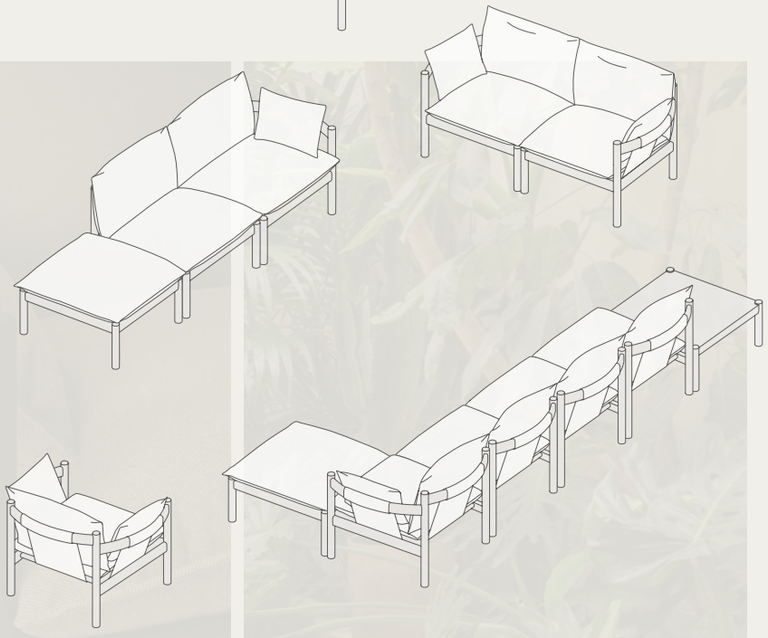
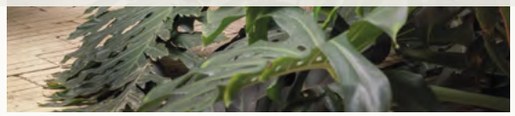
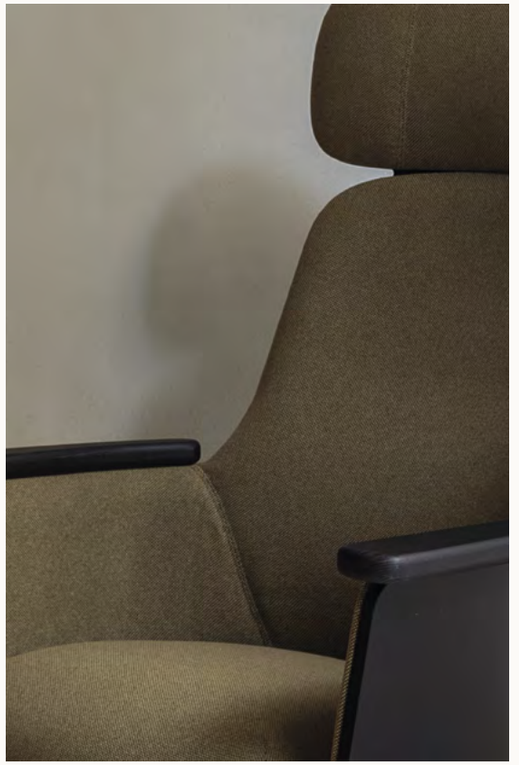
RENTO CONFIGURATIONS

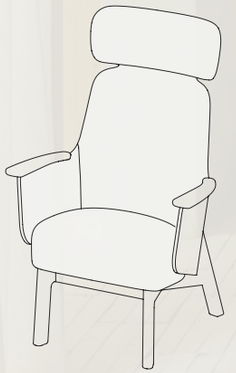






SLIDE CHAIRS ● Design: Lagranja Design
The Slide collection welcomes the new Slide chair. The seat features textile webbing woven over a solid wood frame, providing a comfortable sitting position.
CONIC TABLE SYSTEM ● Design: Emiliana Design Studio
The Conic collection features new versions of long-base tables that allow for larger configurations and endless possibilities.





BAHÍA ARMCHAIR ● Design: Emiliana Design Studio
This contemporary version of the traditional armchair is suitable for long periods of resting, reading or chatting. Its curved lines give personality and warmth, while an enveloping wooden backrest gently embraces and supports you.

CATALINA STOOL ● Design: Andreu Carulla
The Catalina collection introduces a new stool design with a minimalist aesthetic, featuring deliberately simple geometric lines.

CASA TALLER is an urban oasis that exudes tranquillity, a light-filled space where raw materials shape the interior design scheme.

The use of untreated materials adds richness and character to the space, highlighting artisan craftsmanship, tactile textures and porous finishes. These austere, honest materials imbue each room with a warm and soothing colour palette.

Light, captured from the central courtyard, floods the adjoining spaces and invites one to enjoy the ever-changing nuances of natural light. The light creates optimal conditions to bring lush vegetation to life, allowing for a connection with nature and offering visual freshness and calm.

Casa Taller is also conceived as a pottery studio, a creative and experimental space for its owner. His passion for ceramics, a sensory and malleable material, speaks to the human impulse to craft and create.

La CASA TALLER es un oasis urbano que respira tranquilidad, un espacio luminoso en el que la materialidad en estado puro constituye la base del proyecto de interiorismo.

El uso de materiales en crudo aporta riqueza y valor al espacio, dando protagonismo a la manufactura artesanal, las texturas palpables y los acabados porosos. Estos materiales austeros y honestos impregnan cada una de las estancias con una paleta de colores cálida y sosegada.

La luz, captada desde el patio central, inunda los espacios colindantes e invita a disfrutar de los matices de la iluminación natural en permanente cambio. La luz crea las condiciones óptimas para dar vida a una vegetación frondosa que permite conectar con la naturaleza y ofrece frescor y calma visual.

La vivienda alberga un taller de cerámica que sirve como espacio creativo y experimental para su propietario. Su pasión por la cerámica, un material sensorial y maleable, nos conecta con la capacidad humana del saber hacer.

Special thanks to Alberto Aranda, who opened his space to us.
